

## Typical Order of Residential Inspections:

1. Stake Out
2. Plumbing Rough
3. Underground Electric
  4. T-Pole
5. Grade Beam/Piers
6. Foundation Pad
7. Foundation Steel/Cable – All foundation inspections will require an engineers' letter when inspected by an engineer of record instead of Metro Code
8. 2<sup>nd</sup>'s / Roughs – Plumbing, Electrical and Mechanical
  9. Building Frame
10. Energy Rough – after all roughs and before sheetrock cover up
  11. Temp Electric and Gas
  12. Final back flow
13. Finals – Plumbing, Electrical and Mechanical
  14. Final Energy
  15. Final Building
